

Ryan Cho

Full Stack Software Engineer — Go, React & Distributed Systems

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> ·
<https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 7+ years delivering scalable backend services, React/TypeScript applications, and event-driven systems across finance and enterprise platforms. Skilled in Go, Kafka, PostgreSQL, and Kubernetes for secure, high-throughput microservices. Proven track record in REST API design, real-time data integration, CI/CD automation, and compliance-focused development. Collaborative partner to product, design, and QA teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development of **Go backend services and React/TypeScript front ends** for investment operations platforms, unifying portfolio, risk, and reporting workflows across distributed teams.
- Architected **Kafka streaming integrations** for real-time position, pricing, and notification events, enabling sub-second propagation across dependent microservices.
- Designed and maintained **PostgreSQL data models** with migration strategies, indexing, and query optimization, supporting analytics workloads on growing transactional datasets.
- Deployed **Kubernetes-orchestrated microservices** with health checks, resource limits, and autoscaling policies, improving resilience during peak market activity.
- Established **CI/CD pipelines** with automated unit, integration, and security scans, increasing release cadence while preserving compliance and audit requirements.
- Drove **REST API standards and service contracts** adopted by cross-functional squads, reducing integration defects between front-end clients and backend services.
- Collaborated with product managers, designers, and QA to ship **responsive, accessible UI features** aligned to investor and operations stakeholder requirements.
- Implemented **application security controls** including authentication middleware, input validation, and audit logging for sensitive financial data access.
- Conducted **code reviews and technical mentorship** for engineers, elevating testing discipline and maintainability across the full stack codebase.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Engineered **Go microservices** supporting portfolio analytics and trading operations tools, handling high-volume financial data under strict uptime and latency expectations.
- Designed **RESTful APIs** consumed by internal React/TypeScript dashboards, standardizing data access patterns across capital markets applications.
- Built **Kafka-based event pipelines** for asynchronous trade and position updates, decoupling downstream consumers and improving end-to-end data freshness.
- Optimized **PostgreSQL databases** through normalization, indexing, and query refactoring, reducing report generation time on complex multi-table joins.
- Containerized services with **Docker and Kubernetes**, streamlining multi-environment deployments and supporting zero-downtime release practices.
- Partnered with product, QA, and compliance stakeholders to deliver features meeting **regulatory and security standards** in a regulated banking environment.
- Implemented **CI/CD workflows** with automated testing gates, reducing manual release overhead and accelerating delivery of analyst-facing tools.

- Mentored junior analysts on **Git workflows, API design, and testing practices**, raising code quality across a distributed engineering organization.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **React-based dashboards** supporting restaurant inventory and compliance workflows, accelerating feature delivery for pilot customer rollouts.
- Built **TypeScript API clients** connecting front-end interfaces to backend services, improving data consistency across reporting and operations modules.
- Participated in **agile sprints and code reviews**, resolving defects and shipping incremental improvements to production-facing web features.
- Wrote **unit and integration tests** for critical user flows, strengthening release confidence ahead of customer onboarding milestones.
- Assisted in **PostgreSQL schema updates and query tuning** for reporting endpoints, reducing latency on high-volume operational lookups.
- Documented **REST API contracts** and component usage patterns, enabling faster onboarding for incoming engineering interns.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built and shipped **responsive web interfaces** using HTML, CSS, and JavaScript, improving content accessibility for foundation stakeholders and community users.
- Developed **RESTful endpoints and client integrations** that streamlined data collection workflows, reducing manual entry across internal reporting tools.
- Implemented **version-controlled deployment workflows** with Git, enabling repeatable releases and faster iteration on program and campaign pages.
- Collaborated with remote stakeholders to translate **design requirements** into maintainable front-end components, delivering on tight nonprofit launch timelines.
- Optimized page performance through **asset bundling and caching strategies**, improving load times for mobile visitors across key foundation initiatives.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Responsive UI, Component Architecture

Backend: Go (Golang), RESTful APIs, Microservices, Event-Driven Architecture, Node.js

Databases: PostgreSQL, Database Modeling, Query Optimization, SQL, Redis

Cloud & DevOps: Kubernetes, Docker, CI/CD, Git, Container Orchestration, Agile Delivery

Monitoring & Tools: Apache Kafka, Streaming Pipelines, Jest, Integration Testing, Prometheus, Grafana

Workflow & PM: Agile/Scrum, Code Review, Cross-functional Collaboration, Technical Documentation, Jira
