PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years delivering production SaaS across finance and capital markets. Combines technical leadership with hands-on contribution across React, TypeScript, and Node.js. Architects scalable GraphQL and REST APIs, data ingestion pipelines, and platform features at high volume. Mentors engineers through code review and design sessions, drives Agile delivery with Jira, and partners with product to ship reliable, well-tested systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led a team of four engineers across concurrent API, CRM, and data workflow initiatives, establishing **sprint planning and backlog refinement** practices that improved on-time delivery across three product domains.
- Designed and shipped **GraphQL and REST APIs** in Node.js and TypeScript for internal platforms and external partner integrations, maintaining sub-200ms p95 response times under peak trading-day load.
- Built **React and TypeScript** front-end modules for portfolio analytics and client reporting, reducing initial page load by 40% through code splitting, memoization, and query batching.
- Owned **PostgreSQL schema design** and migration strategy for investment data models spanning twelve interconnected domain entities with strict referential integrity constraints.
- Implemented **ETL-style data ingestion pipelines** processing nightly market and holdings feeds, validating records and routing exceptions to downstream reconciliation and alerting systems.
- Introduced **automated testing and CI/CD workflows** within a Yarn Workspaces monorepo, lowering production defect rates by 25% over two consecutive release cycles.
- Mentored three engineers through **structured code reviews and architecture discussions**, supporting two internal promotions within an eighteen-month period.
- Partnered with product and operations stakeholders to define features with **clear acceptance criteria and measurable outcomes**, maintaining delivery transparency through Jira dashboards and technical documentation.
- Adopted **AI-assisted development tooling** to accelerate implementation and review cycles, tracking cycle time and throughput gains across the team's delivery metrics.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React and TypeScript** interfaces for internal trading and risk dashboards used by analysts across global fixed-income and equities desks.
- Built **REST APIs** in Node.js connecting legacy mainframe data sources to modern web applications with comprehensive audit logging for regulated environments.
- Implemented **SQL data models** in PostgreSQL supporting regulatory reporting workflows handling sensitive financial data with role-based access controls.
- Contributed to **automated test suites and CI/CD pipelines** that reduced manual QA effort for monthly compliance releases across multiple application teams.
- Supported **data integration workflows** ingesting market data feeds with validation rules aligned to internal risk and compliance controls.
- Collaborated with cross-functional teams to deliver features within **Agile sprint cadences**, documenting architecture decisions and runbooks for production support handoffs.
- Optimized **database queries and API response times** for high-volume batch reporting jobs processing millions of records during end-of-day processing windows.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for customer-facing ordering workflows, improving mobile responsiveness and usability across supported device form factors.
- Developed **Node.js REST endpoints** for order management and notification services integrated with third-party payment and fulfillment APIs.
- Wrote **unit and integration tests** covering critical checkout paths, raising test coverage on core modules above 80% before production release.
- Participated in **sprint planning and peer code reviews**, contributing to backlog refinement and acceptance criteria for feature delivery.
- Refactored legacy JavaScript modules to **TypeScript**, improving type safety and reducing runtime errors in production checkout flows.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for nonprofit fundraising campaigns reaching donors across multiple channels.
- Integrated **REST API** calls to CMS backends, enabling dynamic content updates without requiring full site redeployment.
- Collaborated with designers to implement **accessible UI patterns** aligned with WCAG 2.0 guidelines for inclusive donor experiences.
- Optimized **page load performance** through asset minification and lazy loading of media resources on content-heavy landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Component Architecture, State Management

Backend: Node.js, GraphQL, REST APIs, Express, Microservices, ETL Pipelines, API Design

Databases: PostgreSQL, SQL, Data Modeling, Schema Design, Query Optimization, Migrations

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Yarn Workspaces, Monorepo Tooling

Monitoring & Tools: Jest, Cypress, ESLint, Prettier, OpenAPI/Swagger, Application Logging

Workflow & PM: Agile/Scrum, Jira, Confluence, Sprint Planning, Technical Mentorship, Stakeholder Communication
