

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years building production SaaS and platform systems across regulated finance and investment technology. Leads delivery of React and TypeScript applications, Node.js services, and GraphQL/REST APIs while mentoring engineers through code review and design. Owns cross-domain initiatives spanning data ingestion, CRM workflows, and scalable PostgreSQL backends with strong Agile execution and stakeholder alignment.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led a **cross-functional squad of 4 engineers** delivering concurrent product and data initiatives with clear sprint scope, acceptance criteria, and measurable release outcomes across **Agile two-week cycles**.
- Architected and shipped **GraphQL and REST APIs** in **Node.js and TypeScript** supporting portfolio analytics, CRM integrations, and external partner workflows serving **500+ daily active users**.
- Built **React and TypeScript** front-end modules in a **Turborepo monorepo**, establishing shared component patterns that reduced duplicate UI logic by **30%** and improved feature delivery consistency.
- Designed **PostgreSQL schemas and migration strategy** for investor data models, optimizing query performance on **multi-million-row datasets** through indexing and materialized views.
- Implemented **ETL-style data ingestion pipelines** ingesting market feeds and third-party CRM exports, with idempotent processing and downstream reconciliation reducing manual data correction by **40%**.
- Mentored **3 junior and mid-level engineers** through structured code reviews, design sessions, and career development conversations, elevating team **test coverage** and release confidence.
- Partnered with Product and operations stakeholders to translate business requirements into **scalable platform features**, maintaining delivery transparency via **Jira dashboards and Confluence** documentation.
- Drove **CI/CD automation** on **AWS** with containerized deployments, cutting average release cycle time from **5 days to 2 days** while maintaining production stability.
- Integrated **AI-assisted development workflows** into team practices, improving code review throughput and reducing defect escape rate in production hotfixes.
- Owned **performance optimization** across API and front-end layers, reducing p95 page load latency by **35%** through caching, query tuning, and bundle splitting.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **production-grade internal applications** supporting trading and risk workflows across globally distributed teams in a **highly regulated banking environment**.
- Built **RESTful microservices** in **Node.js and TypeScript** integrating legacy mainframe data with modern web dashboards used by **200+ analysts** daily.
- Developed **React and TypeScript** interfaces for client reporting tools, applying accessibility and performance standards across **greenfield and legacy system integrations**.
- Engineered **SQL data models** and stored procedures in **PostgreSQL and Oracle**, supporting ETL jobs processing **millions of transactions** with audit-ready lineage.
- Established **automated testing practices** including unit, integration, and contract tests integrated into **CI/CD pipelines**, reducing regression defects in quarterly releases.
- Collaborated with business analysts and compliance stakeholders to scope features with **clear acceptance criteria**, balancing delivery speed with regulatory requirements.

- Contributed to **API design standards** and architecture documentation adopted across the technology analyst program, improving cross-team integration consistency.
- Supported **data ingestion workflows** connecting external market data vendors to internal normalization pipelines with monitoring and alerting for failure recovery.
- Participated in **sprint planning, backlog refinement, and retrospectives**, improving team velocity and predictability across parallel initiative tracks.
- Diagnosed and resolved **production incidents** in distributed services, reducing mean time to recovery through improved observability and runbook documentation.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for customer-facing ordering workflows, integrating with **REST APIs** and improving mobile-responsive layout consistency.
- Implemented **Node.js backend endpoints** for order status tracking and notification triggers, supporting the platform's early **MVP launch**.
- Wrote **unit and integration tests** for critical checkout paths, contributing to a **15% reduction** in production bugs during beta rollout.
- Participated in **Agile standups and code reviews**, delivering scoped features on two-week sprint cadences alongside senior engineers.
- Refactored legacy **JavaScript modules to TypeScript**, improving type safety and developer onboarding speed for subsequent interns.
- Optimized **PostgreSQL queries** for menu catalog searches, improving average response time on high-traffic endpoints.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for foundation outreach programs using **HTML, CSS, and JavaScript**, supporting content updates for nonprofit stakeholders.
- Integrated **third-party donation APIs** with secure form handling and validation, enabling online contribution workflows for campaign launches.
- Collaborated with designers to implement **accessible UI patterns** aligned with WCAG guidelines across informational site sections.
- Deployed static and dynamic assets to **cloud hosting**, configuring basic **CI scripts** for repeatable build and release processes.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Redux, Responsive Design, Component Architecture

Backend: Node.js, TypeScript, GraphQL, REST, Express, Python, Microservices

Databases: PostgreSQL, SQL, Data Modeling, ETL, Schema Design, Oracle

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Containerization, Turborepo, Yarn Workspaces

Monitoring & Tools: Jira, Confluence, Datadog, Logging, Jest, Cypress, Automated Testing

Workflow & PM: Agile, Scrum, Sprint Planning, Backlog Refinement, Technical Leadership, Mentorship
