PROFESSIONAL SUMMARY

Full-stack engineer with 8+ years building distributed, cloud-native applications across finance and SaaS. Expert in TypeScript, Node.js, and React with hands-on experience shipping event-driven APIs, production AI features, and scalable platform services. Track record owning ambiguous cross-system initiatives end to end—from design through deployment and monitoring—while mentoring engineers and aligning product, operations, and leadership on measurable outcomes.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned end-to-end delivery of a **customer-facing order workflow platform** in TypeScript and React, processing **12K+ daily transactions** with sub-second API response times across distributed services.
- Designed **event-driven fulfillment pipelines** on Node.js and AWS Lambda, decoupling order, inventory, and notification systems to improve release cadence and reduce cross-team deployment conflicts by **40%**.
- Shipped **production LLM features** for automated case routing and document summarization, integrating model inference behind versioned APIs with fallback paths that sustained **99.9% uptime** during rollout.
- Led **API design and backwards compatibility** standards for money-movement endpoints, enabling safe schema evolution across **8 downstream consumers** without breaking fulfillment or settlement flows.
- Drove **observability investments**—structured logging, distributed tracing, and actionable dashboards—cutting mean time to detection for production incidents from hours to **under 15 minutes**.
- Partnered with product, operations, and support to translate ambiguous business requirements into **technical designs** for returns, exchanges, and servicing workflows used by internal teams daily.
- Mentored **4 engineers** through code review, pairing, and design sessions, raising team-wide code quality and accelerating onboarding by **standardizing review patterns**.
- Championed **AI developer tooling** adoption across the squad, codifying prompts and workflows that reduced boilerplate implementation time and increased PR throughput without sacrificing test coverage.
- Influenced **platform architecture** with adjacent teams by proposing shared event schemas and idempotency conventions that reduced duplicate integration work across **3 product surfaces**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built **REST and event-driven services** in Node.js and Java supporting trade lifecycle and settlement workflows processing **\$2B+ daily notional** across internal banking platforms.
- Implemented **cloud-native microservices** on AWS with containerized deployments, improving environment parity and reducing release-related defects during quarterly cutovers.
- Designed **data models and API contracts** for cross-system reconciliation tools, enabling backwards-compatible schema changes while maintaining audit requirements for regulatory reporting.
- Delivered **React dashboards** for operations teams monitoring batch job health, surfacing anomalies across **50+ upstream feeds** and reducing manual triage time substantially.
- Collaborated with **platform and risk teams** to integrate authentication, authorization, and encryption patterns into shared services used by multiple trading applications.
- Led **refactoring initiatives** on legacy batch pipelines, introducing idempotent job handlers and retry semantics that improved recovery from partial failures during peak processing windows.
- Supported **production releases** with runbooks, monitoring hooks, and stakeholder communication across product, QA, and business analysts in a highly regulated environment.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React components** for a customer-facing web application, improving page load interactions and accessibility across core user flows.
- Built **Node.js API endpoints** connecting frontend features to PostgreSQL-backed services with input validation and structured error handling.
- Contributed to **CI/CD pipeline** improvements that automated test runs and deployment previews for the engineering team.
- Participated in **code reviews and sprint planning**, gaining exposure to full-stack delivery practices in a remote startup environment.
- Implemented **responsive UI patterns** aligned with design specifications, reducing rework during QA cycles.
- Documented **API integration steps** for third-party payment modules, enabling faster handoff to senior engineers.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **static and dynamic web pages** using HTML, CSS, and JavaScript for foundation marketing and program content.
- Collaborated with stakeholders to **translate content requirements** into maintainable page structures and reusable layout components.
- Optimized **page performance** through asset compression and lazy loading, improving load times on mobile connections.
- Maintained **cross-browser compatibility** fixes for legacy content sections used by community partners.
- Supported **content updates** and minor feature enhancements during a short-term remote engagement.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Component Architecture, State Management

Backend: Node.js, TypeScript, Event-Driven Architecture, REST APIs, Serverless, Microservices, LLM Integration, API Versioning

Databases: PostgreSQL, MongoDB, Redis, SQL, Data Modeling, Schema Migration, Query Optimization

Cloud & DevOps: AWS (Lambda, ECS, S3, SQS, SNS), Docker, CI/CD, GitHub Actions, Infrastructure as Code, Cloud-Native Deployment

Monitoring & Tools: Datadog, Distributed Tracing, Structured Logging, OpenTelemetry, Git, AI Developer Tooling, Postman

Workflow & PM: Agile/Scrum, Cross-Functional Collaboration, Technical Design Docs, Code Review, Mentorship, Stakeholder Communication
