PROFESSIONAL SUMMARY

Senior software engineer with 7+ years delivering client-facing APIs, platform services, and financial systems across fintech and global banking. Owns end-to-end feature delivery from MVP through production scale, with emphasis on API design, fault tolerance, and reusable architecture. Collaborates with customers, vendors, and product leaders in high-ownership, fast-paced environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and shipped **platform extensions** and **RESTful APIs** for credential orchestration, account workflows, and client onboarding across multiple product surfaces.
- Partnered directly with **customers and vendors** to translate business requirements into **reusable software primitives** adopted across the broader client base.
- Led iterative delivery from **MVP to production scale**, balancing fast shipping with **fault-tolerant service design** and long-term maintainability.
- Established **API design standards**, schema conventions, and documentation practices that improved developer experience for downstream integration teams.
- Contributed to **architecture decisions** for microservices handling sensitive financial data, prioritizing correctness, observability, and compliance-aware patterns.
- Built **client-facing dashboards** and integration flows with strong UX focus, reducing configuration errors and support burden during customer rollout.
- Implemented **CI/CD pipelines** and automated test coverage across payment-adjacent transaction and settlement services, increasing release confidence.
- Mentored engineers on **full-stack craft**, code review quality, and product-minded engineering practices within a small, high-ownership team.
- Collaborated with product and executive stakeholders to prioritize **roadmap investments** for platform capabilities serving enterprise financial clients.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **enterprise banking applications** supporting treasury, trade finance, and payment operations for institutional clients across global markets.
- Built **API integrations** connecting internal platforms with external processors and vendor systems within regulated financial workflows.
- Shipped features in a **fast-paced product environment**, iterating on requirements with business analysts, operations, and technology partners.
- Improved **system reliability** for transaction processing pipelines through structured error handling, retry logic, and operational monitoring.
- Participated in **architecture reviews** for platform services managing credential and account data within strict compliance boundaries.
- Automated reconciliation and reporting tooling with **Python and Java services**, reducing manual effort for operations teams across daily settlement cycles.
- Partnered across technology, risk, and compliance groups to deliver **audit-ready data pipelines** and client-facing reporting capabilities.

- Contributed to **engineering standards** and knowledge sharing during platform modernization initiatives spanning multiple business units.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **full-stack features** for a document management SaaS product using React, Node.js, and PostgreSQL.
- Shipped **customer-facing UI improvements** that streamlined checkout and account setup flows for restaurant clients.
- Implemented **REST API endpoints** for document retrieval, authentication, and role-based access control.
- Wrote **unit and integration tests** that improved release stability across core application modules.
- Collaborated with product designers to refine **UX patterns** and responsive layouts for mobile-first users.
- Participated in **agile sprints** and code reviews, contributing to iterative delivery in a startup environment.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** and content components for a nonprofit foundation site using HTML, CSS, and JavaScript.
- Integrated **third-party APIs** for donation processing and newsletter signup workflows.
- Optimized **page load performance** and accessibility across desktop and mobile viewports.
- Collaborated with stakeholders to deliver **content updates** and layout changes under tight deadlines.
- Established **version control** and deployment practices for ongoing site maintenance.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, UX Collaboration

Backend: Node.js, Python, Java, REST APIs, GraphQL, Microservices, SDK Integrations

Databases: PostgreSQL, MySQL, Redis, SQL, Data Modeling

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Infrastructure as Code

Monitoring & Tools: Datadog, Grafana, Logging & Observability, Git, Postman, Swagger/OpenAPI

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Customer Discovery, Technical Documentation
