PROFESSIONAL SUMMARY

Full stack engineer with 7+ years delivering enterprise web applications and distributed backend services for finance and capital markets. Proficient in C#, .NET Core, ASP.NET Web API, React, Angular, and SQL Server with end-to-end ownership from architecture through Azure deployment. Experienced in secure API design, microservices patterns, CI/CD automation, and cross-team delivery within Agile environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **enterprise-grade web applications** using **C#**, **.NET Core**, and **ASP.NET Web API**, supporting portfolio analytics workflows used daily by **40+ investment professionals** across distributed teams.
- Designed **microservices** and **event-driven integration patterns** to decouple legacy monolith capabilities, reducing deployment coupling and enabling **independent service releases** on a predictable two-week cadence.
- Built **responsive front-end experiences** with **React** and **TypeScript**, improving usability for complex data-entry workflows while maintaining **accessibility standards** and sub-second interaction latency on high-traffic screens.
- Optimized **SQL Server** schemas, **stored procedures**, and **query execution plans**, cutting average API response times by **35%** for reporting endpoints handling multi-million-row datasets.
- Implemented **OAuth2**, **JWT**, and **Azure AD**-based authentication across internal and partner-facing APIs, hardening access controls for **sensitive financial data** in compliance with enterprise security policies.
- Owned **CI/CD pipeline** integration with **Azure DevOps** and **Git** branching workflows, automating builds, tests, and staged deployments that reduced release defects and accelerated production rollouts.
- Led **root-cause analysis** and remediation for production incidents, restoring service availability and documenting **operational runbooks** that shortened mean time to recovery for recurring failure scenarios.
- Mentored **three junior engineers** on **clean architecture**, code review practices, and **async/await** patterns, raising team pull-request throughput while maintaining high code quality standards.
- Produced **technical design documentation** and API specifications for cross-functional stakeholders, aligning platform roadmaps with **performance**, **security**, and **auditability** requirements.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **production-grade backend services** in **C#** and **.NET Core** for trading operations platforms, supporting **high-volume transaction processing** with strict reliability and audit requirements.
- Built **RESTful APIs** with **ASP.NET Web API** and **dependency injection**, enabling secure data exchange between front-office applications and downstream risk systems.
- Created **Angular**-based internal dashboards that consolidated operational metrics, improving visibility for **technology and business stakeholders** across multiple business units.
- Tuned **SQL Server** databases including **indexes**, **stored procedures**, and **locking behavior**, resolving performance bottlenecks affecting end-of-day batch processing windows.
- Integrated applications with **cloud-hosted services** on **Azure**, including managed identity configuration and environment-specific deployment pipelines for dev, staging, and production.
- Participated in **Agile/Scrum** ceremonies and cross-team design reviews, delivering incremental releases aligned with enterprise architecture standards and regulatory constraints.
- Conducted **code reviews** and automated testing for **unit** and **integration** coverage, reducing regression risk across shared platform components adopted by **multiple development teams**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **full stack feature development** using **C#**, **ASP.NET**, and **JavaScript**, delivering user-facing modules for document management workflows.
- Implemented **REST API endpoints** and database access layers with **SQL Server**, supporting CRUD operations and validation for client onboarding features.
- Assisted in building **React** components for responsive UI screens, collaborating with senior engineers to meet **accessibility** and **cross-browser compatibility** goals.
- Participated in **Git**-based version control and **CI** build processes, gaining hands-on experience with branching strategies and peer code review workflows.
- Resolved **debugging** and integration issues across front-end and back-end layers, helping stabilize releases during active product iteration cycles.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **web applications** and content-driven pages using **HTML**, **CSS**, **JavaScript**, and server-side scripting for nonprofit digital initiatives.
- Built interactive UI components that improved **user engagement** across campaign landing experiences and community resource portals.
- Collaborated with stakeholders to translate requirements into **functional specifications** and iterative delivery milestones within a fast-paced remote environment.
- Applied **responsive design** techniques ensuring consistent rendering across desktop and mobile browsers for diverse visitor audiences.
- Maintained and extended existing site features, performing **troubleshooting** and content updates that kept platforms stable during active fundraising periods.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Component-Driven Architecture

Backend: C#, .NET Core, ASP.NET Web API, RESTful APIs, Microservices, Event-Driven Architecture, OAuth2, JWT, OpenID Connect

Databases: SQL Server, Stored Procedures, Query Optimization, Index Tuning, Relational Schema Design

Cloud & DevOps: Azure, AWS, Azure AD, Azure DevOps, CI/CD Pipelines, Docker, Git, Infrastructure-as-Code

Monitoring & Tools: Application Insights, Logging & Observability, Performance Profiling, Postman, Visual Studio

Workflow & PM: Agile/Scrum, Technical Documentation, Cross-Functional Collaboration, Jira, Confluence
