PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building scalable web applications across fintech and SaaS. Deep expertise in JavaScript, TypeScript, React, and Next.js with production experience in GraphQL APIs, relational databases, and authentication systems. Proven track record delivering resilient platform features, automated testing pipelines, and CI/CD workflows while collaborating across product, design, and engineering teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development of **investor-facing React dashboards** serving portfolio analytics across 12+ fund products, improving page load performance by 35% through code-splitting and selective GraphQL query optimization.
- Architected and shipped a **Next.js App Router** migration for the client portal, unifying authentication flows with NextAuth.js and reducing session-related support tickets by 40%.
- Designed **REST and GraphQL APIs** in Node.js and TypeScript backing real-time capital allocation workflows, integrating PostgreSQL via Prisma with transactional integrity for multi-step fund operations.
- Built comprehensive **automated test coverage** with Jest, React Testing Library, and Playwright across 200+ UI scenarios, cutting regression defects in quarterly releases by half.
- Implemented a **TailwindCSS design system** adopted by three engineering squads, standardizing responsive layouts and accelerating delivery of new product surfaces.
- Established **GitHub Actions CI/CD pipelines** with Vercel preview deployments, enabling daily production releases with automated linting, type checks, and integration test gates.
- Partnered with product and compliance stakeholders to deliver **role-based access controls** and audit logging for sensitive financial data, meeting regulatory review requirements across two audit cycles.
- Mentored two junior engineers on **full stack development practices**, conducting code reviews and pairing sessions that raised team PR throughput while maintaining quality standards.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **internal trading support applications** in React and TypeScript used daily by 80+ technology analysts, streamlining reconciliation workflows across fixed-income operations.
- Built **Node.js microservices** exposing GraphQL endpoints via Apollo Server, aggregating market data feeds and reducing manual data pulls for downstream analytics teams.
- Created responsive **HTML5 and CSS3 interfaces** for risk reporting tools, integrating Chart.js visualizations that improved leadership visibility into daily exposure metrics.
- Managed **PostgreSQL and MySQL schemas** with migration tooling, optimizing query plans for reporting jobs that processed millions of rows nightly without SLA breaches.
- Integrated **Auth0 authentication** into employee-facing tools, standardizing SSO across five internal applications and simplifying access management for rotating analyst cohorts.
- Wrote **Cypress and Jest test suites** for critical payment validation paths, catching edge-case failures before production deployment during three major regulatory deadlines.
- Contributed to **AWS Lambda serverless functions** for event-driven notification pipelines, decoupling alert delivery from monolithic batch processes and improving recovery times.
- Collaborated across global technology teams in agile sprints, translating **business requirements** into technical specifications and delivering features aligned with quarterly release trains.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for restaurant check-management workflows, supporting tablet interfaces used by front-of-house staff across pilot locations.
- Implemented **REST API integrations** in JavaScript connecting mobile clients to backend order services, handling error states and offline retry patterns.
- Authored **unit tests with Jest** for shared UI utilities, increasing coverage on payment calculation modules ahead of a production rollout.
- Participated in **Git-based code reviews** and sprint planning, contributing feature estimates and documentation for three consecutive release cycles.
- Refactored legacy **CSS layouts** to responsive patterns, improving usability on varied screen sizes during a beta expansion to additional venues.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **JavaScript web pages** for foundation outreach campaigns, delivering accessible HTML5 markup consistent with brand guidelines.
- Styled public-facing content with **CSS3**, ensuring cross-browser compatibility for donation and event registration flows.
- Configured **Git workflows** for small-team collaboration, maintaining version history across iterative content updates.
- Supported deployment of static assets to hosting infrastructure, validating **end-to-end page behavior** before launch deadlines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, HTML5, CSS3, React, Context API, Next.js, App Router, TailwindCSS, Chart.js

Backend: Node.js, GraphQL, Apollo Server, REST APIs, NextAuth.js, Auth0, serverless functions

Databases: PostgreSQL, MySQL, Prisma, Drizzle, schema migrations, query optimization

Cloud & DevOps: AWS, AWS Lambda, Vercel, GitHub Actions, CI/CD, Netlify, edge computing

Monitoring & Tools: Playwright, Cypress, Jest, React Testing Library, Git, GitHub, GitLab

Workflow & PM: Agile, Scrum, cross-functional collaboration, code review, technical documentation
