

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 7+ years building scalable web applications across financial services and SaaS platforms. Deep expertise in .NET Core, C#, React, and TypeScript, designing RESTful microservices and cloud-native solutions on Azure and AWS. Proven track record improving platform reliability, reducing technical debt, and delivering accessible front-end experiences in distributed remote teams. Combines strong backend architecture with pragmatic full stack delivery and cross-functional collaboration.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **.NET Core microservices** powering portfolio analytics and reporting APIs for institutional investment workflows across distributed Azure environments.
- Built **React and TypeScript** dashboards with accessible UI patterns, streamlining analyst review cycles for trading, risk, and compliance operations.
- Established **REST API design standards** and code review practices that lowered production defect rates and accelerated cross-team feature delivery.
- Led migration of legacy **ASP.NET components** to .NET Core services with Entity Framework Core, reducing deployment complexity and simplifying data access layers.
- Expanded **automated test coverage** using xUnit and Jest across backend and frontend modules, strengthening release quality for financial calculation pipelines.
- Partnered with product and operations stakeholders to **prioritize technical debt** remediation, stabilizing high-traffic endpoints during peak market activity.
- Containerized services with **Docker** and CI/CD pipelines, enabling consistent releases and repeatable environments for a fully remote engineering team.
- Integrated **observability tooling** with structured logging and metrics dashboards, shortening detection time for API latency and availability regressions.
- Mentored engineers on **secure coding practices** and microservice boundaries during design reviews, onboarding, and architecture discussions.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **.NET Core REST APIs** within a microservices architecture supporting trade processing, settlement workflows, and regulatory reporting at enterprise scale.
- Engineered **React and TypeScript** internal tools for operational monitoring and data validation used by technology and business teams across global markets.
- Designed **Entity Framework Core** data access layers over SQL Server schemas, improving query efficiency for high-volume transactional banking workloads.
- Contributed to **Azure cloud migration** initiatives by containerizing legacy services and establishing infrastructure-as-code deployment patterns.
- Authored **unit and integration tests** with xUnit and NUnit, supporting automated release gates for mission-critical capital markets applications.
- Participated in **architecture design reviews** and technical planning, influencing API contracts and service boundaries across cross-functional squads.
- Resolved production reliability issues through **root cause analysis** and incremental platform improvements, maintaining SLA targets for global trading operations.

- Collaborated with distributed teams across New York and EMEA to deliver **incremental platform enhancements** aligned with compliance and security requirements.
- Reduced **technical debt** in shared authentication services, improving maintainability for downstream consumer applications across the platform.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React** front-end components and REST API integrations for inventory and logistics workflows serving restaurant industry clients.
- Implemented **C# and .NET** backend endpoints with Entity Framework, supporting persistence and business logic for customer-facing web features.
- Wrote **unit tests** and participated in code reviews, following Git branching workflows and team engineering standards.
- Delivered responsive **HTML, CSS, and JavaScript** interfaces with attention to usability and cross-browser compatibility.
- Collaborated remotely with senior engineers to **debug production issues** and ship iterative improvements to platform reliability.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML, CSS, and JavaScript** web pages for nonprofit fundraising and community outreach initiatives.
- Integrated third-party APIs and form workflows to support **donor engagement** and event registration features.
- Maintained **Git** version control practices and deployed updates to hosted web environments.
- Collaborated with stakeholders to translate requirements into **clean, accessible** front-end implementations.
- Delivered project milestones within a **remote development cadence** during a focused three-month engagement.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Accessibility (WCAG)

Backend: C#, .NET Core, ASP.NET, REST APIs, Microservices, Entity Framework Core

Databases: SQL Server, PostgreSQL, Relational Schema Design, ORMs, Query Optimization

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Infrastructure as Code

Monitoring & Tools: OpenTelemetry, Datadog, Structured Logging, xUnit, NUnit, Jest, Cypress

Workflow & PM: Agile/Scrum, Code Reviews, Design Reviews, Technical Planning, Jira, Git Workflows
