PROFESSIONAL SUMMARY

Full-stack engineer with 8+ years delivering production SaaS and regulated-industry systems in React, TypeScript, Python, and SQL. Owned end-to-end product development, third-party integrations, and platform reliability across startup and enterprise settings. Shipped LLM-assisted workflows, retrieval pipelines, and multi-step automation with focus on correctness, auditability, and scale. Proven in high-ambiguity environments with founding-level ownership and direct stakeholder partnership.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **full-stack product features** across React/TypeScript frontends and **Python microservices** supporting investment operations used by **40+ internal stakeholders**
- Owned **third-party API integrations** end-to-end—from technical scoping and auth design through production rollout and ongoing reliability monitoring
- Built **retrieval-backed document workflows** that reduced manual review time for research teams processing **thousands of records monthly**
- Designed **multi-step agent-style automations** orchestrating tool calls across internal services to streamline repetitive operational tasks
- Optimized **SQL queries and backend services**, cutting p95 API latency by **35%** on high-traffic reporting endpoints
- Partnered with founders and product leads on **roadmap prioritization**, translating ambiguous requirements into shippable milestones in a **fast-paced startup cadence**
- Implemented **output validation and guardrails** for AI-assisted features to improve correctness and reduce erroneous generated content in user-facing flows
- Established **CI/CD pipelines and observability** with structured logging and alerting that improved incident detection across production services
- Mentored **junior engineers** on full-stack patterns, testing standards, and integration design during team growth from **4 to 12 engineers**

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack internal tools** in a **regulated banking environment**, pairing React/TypeScript UIs with Python services for risk and operations teams
- Built **SQL data models and reporting pipelines** supporting compliance workflows subject to audit and strict data governance requirements
- Delivered **integration middleware** connecting legacy core banking systems with modern REST APIs used by **multiple business units**
- Shipped **document extraction and validation tooling** that automated regulatory submission prep and reduced manual data entry errors
- Optimized **backend batch jobs** processing large financial datasets, improving nightly pipeline runtime by **28%**
- Collaborated with **compliance and audit stakeholders** to design features meeting traceability, access control, and correctness standards
- Progressed from **Technology Summer Analyst to Technology Analyst**, consistently owning increasing scope across frontend, backend, and data layers
- Participated in **architecture reviews** and on-call rotation for mission-critical trading operations platforms

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed **React and TypeScript features** to a check-management SaaS platform serving restaurant and hospitality clients
- Implemented **REST API integrations** between frontend modules and Python backend services with thorough unit test coverage
- Assisted with **SQL schema changes** and query optimization for customer reporting dashboards
- Participated in **agile ceremonies** and code reviews, shipping incremental improvements each sprint across a remote engineering team
- Built **internal admin tooling** that streamlined customer onboarding workflows for operations staff

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive marketing websites** using JavaScript, HTML, and CSS for foundation outreach campaigns
- Integrated **CMS and donation backends** to support content publishing and contribution tracking
- Resolved **cross-browser compatibility** issues and improved Lighthouse performance scores across key landing pages
- Partnered with nonprofit stakeholders to iterate on **user-facing web experiences** under tight launch deadlines

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML/CSS, component architecture, responsive UI, design systems

Backend: Python, Node.js, REST APIs, microservices, agent orchestration, RAG pipelines, integration design

Databases: PostgreSQL, SQL, query optimization, data modeling, ETL pipelines

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, infrastructure automation, containerized deployments

Monitoring & Tools: Datadog, structured logging, alerting, Git, Jest, Pytest, Postman

Workflow & PM: Agile/Scrum, Jira, technical documentation, cross-functional collaboration, stakeholder alignment
