

Ryan Cho

Senior Full Stack Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 8+ years delivering scalable web applications, APIs, and data-intensive platforms across finance and enterprise settings. Proficient in React, TypeScript, Python, and cloud-native architectures on AWS. Led end-to-end product delivery from technical design through deployment while mentoring engineers and collaborating with product and design. Skilled at building secure, maintainable systems that connect complex data workflows and support high-volume transactional workloads.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned end-to-end delivery of a **React and TypeScript** portfolio analytics platform used daily by investment teams to monitor positions across hundreds of active instruments.
- Architected **Python microservices** exposing REST APIs that aggregated market and fund data, reducing report generation latency across core portfolio workflows.
- Designed **scalable AWS infrastructure** with Docker and Kubernetes deployments, enabling weekly zero-downtime releases for production services.
- Built **secure data ingestion pipelines** processing financial records with encryption and role-based access controls, supporting auditable compliance workflows.
- Partnered with product managers and designers to ship **customer-facing dashboards** that streamlined analyst review cycles and improved operational visibility.
- Established **frontend architecture patterns** with Next.js and shared component libraries, reducing duplicate UI code across three product teams.
- Mentored **four junior engineers** through code reviews, design sessions, and pairing, raising team deployment confidence and engineering standards.
- Led technical design for a **GraphQL API layer** unifying disparate backend services, simplifying client integrations and frontend data-fetch patterns.
- Drove observability improvements with **Datadog and CloudWatch** monitoring, shortening mean time to detect production incidents across critical services.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack trading support applications** with React and Java services handling high-volume transactional workflows across global markets operations.
- Built **RESTful APIs and backend services** in Python and Java integrating risk and reference data sources for teams across multiple business units.
- Contributed to **cloud-native migration** initiatives on AWS, containerizing legacy applications with Docker and improving deployment reliability.
- Implemented **secure authentication flows** with OAuth2 and SAML integrations, strengthening access controls for sensitive financial data platforms.
- Designed **SQL-driven reporting pipelines** transforming raw transactional data into executive dashboards for regulatory and risk reporting.
- Collaborated with product, compliance, and engineering stakeholders to deliver **customer-facing internal tools** through iterative requirements and feedback loops.
- Participated in **code reviews and engineering standards** discussions, promoting maintainable patterns and test coverage across a distributed organization.

- Supported **distributed systems troubleshooting** for production incidents, partnering with reliability teams to restore services and document root-cause findings.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React web features** for a restaurant management platform, improving order tracking and check settlement workflows for venue operators.
- Implemented **REST API integrations** between frontend components and Node.js backend services supporting real-time payment status updates.
- Wrote **unit and integration tests** for critical payment flows, increasing release confidence for production deployments.
- Collaborated with senior engineers on **TypeScript refactoring** efforts that improved type safety and reduced runtime defects across shared modules.
- Contributed to **Agile sprint delivery**, participating in standups, retrospectives, and feature planning with product stakeholders.
- Documented **API contracts and component libraries** to accelerate onboarding for new engineering hires on the team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, improving accessibility and mobile usability.
- Integrated **content management workflows** enabling non-technical staff to publish updates without developer assistance.
- Optimized **page load performance** through asset compression and lazy loading on key organizational landing pages.
- Collaborated with stakeholders to translate **design mockups** into production-ready interfaces aligned with organizational branding.
- Maintained **cross-browser compatibility** and conducted QA testing across devices before each release cycle.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, React, Next.js, JavaScript, HTML/CSS, Redux, responsive UI design

Backend: Python, Go, Java, Node.js, REST APIs, GraphQL, microservices architecture

Databases: PostgreSQL, SQL, Snowflake, Redis, data modeling

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM), Docker, Kubernetes, Terraform, CI/CD pipelines

Monitoring & Tools: Datadog, Grafana, CloudWatch, Git, Postman, Airflow

Workflow & PM: Agile/Scrum, Jira, technical design documentation, cross-functional collaboration, code review leadership
